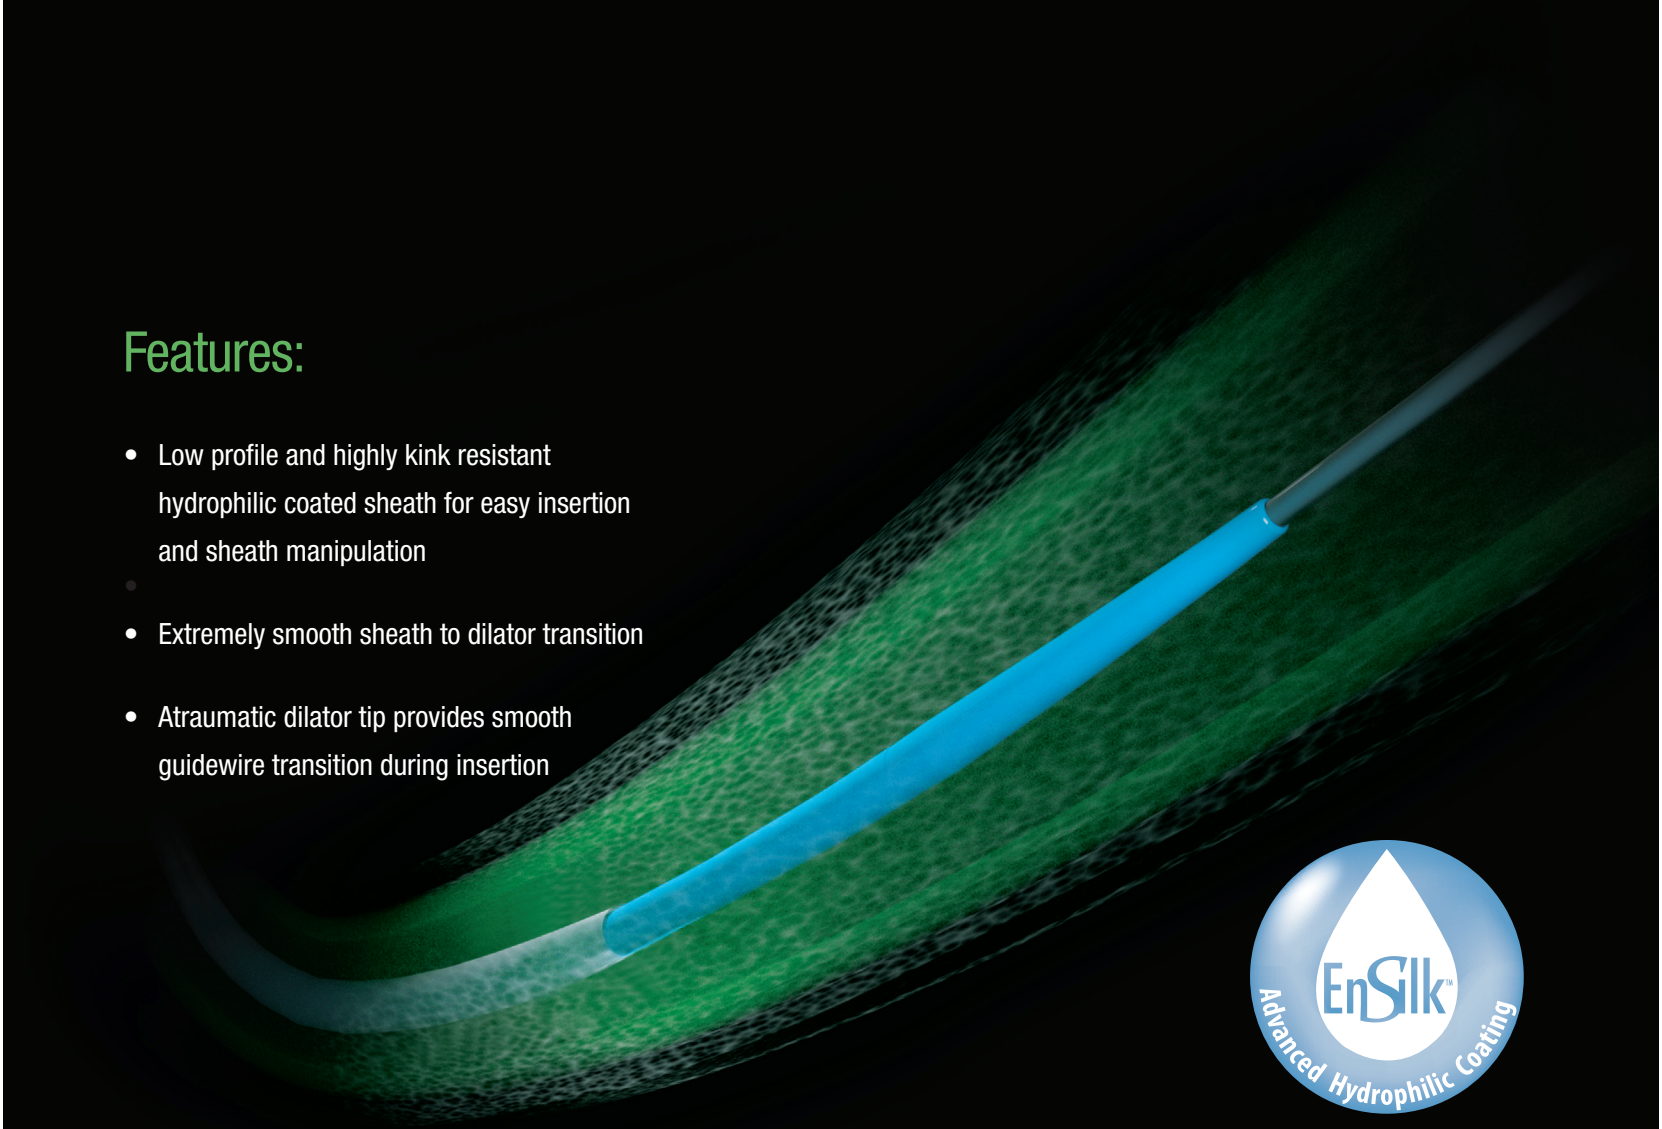
Adelante® Radial

INTRODUCER WITH HEMOSTATIC VALVE

The Adelante® *Radial* is a high performance hydrophilic coated introducer sheath system optimized for radial access, featuring the latest in hemostatic valve technology for minimal blood loss during guidewire manipulation, diagnostic angiography and percutaneous coronary intervention. The Adelante® Radial features a low profile kink-resistant and hydrophilic coated sheath for smooth and atraumatic insertion and removal of the device. The Adelante® Radial represents the latest and newest in low profile introducer sheath technology.

Features:

- Low profile and highly kink resistant hydrophilic coated sheath for easy insertion and sheath manipulation
- Extremely smooth sheath to dilator transition
- Atraumatic dilator tip provides smooth guidewire transition during insertion



- High performance fluid-activated EnSilk™ hydrophilic coated sheath technology to facilitate easy sheath insertion and atraumatic access
- Reliable SureSeal™ hemostatic valve technology to minimize air embolism and blood loss even under extreme conditions
